Admission requirements and prerequisites

- **Prerequisite**: a bachelor degree that in level, extent and contents corresponds to a bachelor degree in computer science from Aarhus University.

- **Minimum requirements for the bachelor programme**
  - 20 ECTS programming, including object-oriented programming, functional programming and software architecture.
  - 20 ECTS computer systems, including databases, computer architecture, networks, operating systems, distributed systems and security.
  - 20 ECTS theoretical computer science, including algorithms and data structures, logic and computability, formal languages and compilers, optimization and complexity theory.
  - 10 ECTS human-machine interaction and experimental system development.
  - 20 ECTS basic subjects in mathematics, probability theory and statistics.

- The course basis for admission must reflect contemporary theory and practice.
Admission requirements and prerequisites

- Interpretation:
- If a few topics is missing in the bachelor programme it is up to an individual assessment whether admission is possible.
- However, all prerequisites for a majority of the specializations offered must be satisfied.

Elective
Structure of Master’s Degree Programme

- **Specialization:**
  - Two 30 ECTS specializations
- **Elective:**
  - Recommendation is a 3rd specialization.
  - A small number of elective courses in computer science is offered in addition to specializations. Project work (partly) is also a possibility.
  - Elective courses may be supportive rather than core computer science, e.g. extra mathematics courses.
  - There may be requirements for the composition of the study program in connection with possible admission. In this case mandatory courses replace the elective courses (partly).
- **Thesis:** Written within the area of specialization 1 or 2
Current specializations

- Specializations are taught by active researchers in the corresponding field
- Current offerings
  - Algorithmics (30 ECTS)
  - Cryptology (30 ECTS)
  - Data-Intensive Systems (30 ECTS)
  - Human-computer Interaction (30 ECTS)
  - Programming Languages (30 ECTS)
  - Ubiquitous Computing and Interaction (30 ECTS)
  - Bioinformatics (30 ECTS)
    - For more than a single specialization in bioinformatics apply for the special Master’s Degree Programme in Bioinformatics
Semesters are independent – can be taken in any order
Third semester may be replaced with Advanced Data Management and Analysis (10 ECTS) from the Data-intensive Systems group

Algorithms and Data Structures
- Lars Arge
- Gerth Stølting Brodal
- Peyman Afshani
- Kasper Green Larsen
- Kristoffer Arnsfelt Hansen

Elective Courses (CS)

- Elective courses (apart from specialisations) offered in Computer Science in 2019/20:
  - Fall
    - Interdisciplinary Digital Entrepreneurship (10 ECTS)
    - Machine Learning (10 ECTS) (bachelor course)
  - Fall & Spring:
    - Project work in Computer Science (5 or 10 ECTS)
  - Summer
    - (29 July - 16 August 2019): Identity and Privacy (5 ECTS)
