Admission requirements and prerequisites

- **Prerequisite**: a bachelor degree that in level, extent and contents corresponds to a bachelor degree in computer science from Aarhus University

- **Minimum requirements for the bachelor programme**
  - 20 ECTS programming, including object-oriented programming, functional programming and software architecture.
  - 20 ECTS computer systems, including databases, computer architecture, networks, operating systems, distributed systems and security.
  - 20 ECTS theoretical computer science, including algorithms and data structures, logic and computability, formal languages and compilers, optimization and complexity theory.
  - 10 ECTS human-machine interaction and experimental system development.
  - 20 ECTS basic subjects in mathematics, probability theory and statistics.

- The course basis for admission must reflect contemporary theory and practice.
Admission requirements and prerequisites

- Interpretation:
- If a few topics is missing in the bachelor programme it is up to an individual assessment whether admission is possible.
- However, all prerequisites for a majority of the specializations offered must be satisfied.
For comparison: Bachelor’s degree in Computer Science at AU

### Specialization:
- Two 30 ECTS specializations

### Elective:
- Recommendation is a 3rd specialization.
- A small number of elective courses in computer science is offered in addition to specializations. Project work (partly) is also a possibility.
- Elective courses may be supportive rather than core computer science, e.g. extra mathematics courses.
- There may be requirements for the composition of the study program in connection with possible admission. In this case mandatory courses replace the elective courses (partly).

### Thesis:
Written within the area of specialization 1 or 2
Current specializations

- Specializations are taught by active researchers in the corresponding field
- Current offerings
  - Algorithmics (30 ECTS)
  - Cryptology (30 ECTS)
  - Human-computer Interaction (30 ECTS)
  - Programming Languages (30 ECTS)
  - Ubiquitous Computing and Interaction (30 ECTS)
  - Bioinformatics (30 ECTS)
    - For more than a single specialization in bioinformatics apply for the special Master’s Degree Programme in Bioinformatics

Elective Courses (CS)

- Elective courses (apart from specialisations) offered in Computer Science in 2018/19:
  
  **Fall**
  - Interdisciplinary Digital Entrepreneurship (10 ECTS)
  - Machine Learning (10 ECTS) (bachelor course)

  **Fall & Spring:**
  - Project work in Computer Science (5 or 10 ECTS)

  **Summer**
  - (29 July - 16 August 2019): Identity and Privacy (5 ECTS)
